Methods to fix QuickBooks Error C=51

#1: REPAIR YOUR DATA FILE

- To troubleshoot QuickBooks Error Code c=51 the very important step is to repair your data file in the same versions of QuickBooks.
- You do not need to upgrade your version of QuickBooks to use the repaired data file.

#2: REBUILT THE DATA

- To begin with, the user is required to exit the QuickBooks accounting software.
- The next step is to close all the windows within the QuickBooks.
- Followed by again starting the QuickBooks.
- Once done with that, the user is required to repeat the action in which the C=51 error was encountered.

#3: USE QUICKBOOKS LATEST VERSION

- To resolve the error you need to update your QuickBooks to the latest release or use the same or latest version when a user tries to restore all backup files.
- In this way, a user will easily restore the backup files with its latest version in QuickBooks.

#4: RESTORE YOUR BACKUP

- The user needs to check the file size once the backup is created, and make sure the file size is not less than 6 MB.
- In order to check the file sizes and make sure that they are accurate, the user needs to right-click the file and select the Properties option.
- In case the file size is less than 6 MB, then the file is not a true backup file, the user now needs to create a new backup file from the working file.
